PRODUCT MANAGEMENT
WITH GENERATIVE & AGENTIC AI

Capstone Project Guidelines
Total Marks: 40

Project Submission Guidelines

- Project has to be submitted in 5 phases.

Phase	Marks	Deadline	Submission Type
Phase 1 Submission	5 Marks	15th Jan, 2026	Pdf with required and asked links hyperlinked
Phase 2 Submission	5 Marks	19th March, 2026	Pdf with required and asked links hyperlinked
Phase 3 Submission	10 Marks	9th April, 2026	Pdf with required and asked links hyperlinked
Phase 4 Submission	10 Marks	7th May, 2026	Pdf with required and asked links hyperlinked
Phase 5 Submission	10 Marks	4th June, 2026	Pdf with required and asked links hyperlinked
Phase 5 Live Presentation		8th June Onwards	Team Presentation in a Live Meeting

- Where to submit?
 - Submission window will be created on LMS 1 week prior to respective deadlines.
- What to submit?
 - Check the details on further pages.
- Must have things in the submission?
 - Team list and their contribution
 - Team list must include student codes/ids

Project Submission Phase 1

Project Submission Phase 1 (Continued in next page)

- Begin exploring product ideas to solve the problem you have selected
- Use some of the following frameworks
 - ERRC
 - SCAMPER
 - Brainstorming
- What are the sources for these ideas?
- How will you gather the ideas?

Project Submission Phase 1 (Continued in next page)

- Who is/are your customer(s)?
- Who is your competition?
- What is your CVP?
- Create your value proposition canvas
- Why will customer switch to your solution?
- What is the unit of sale?
- What are the revenue models?
- How will you forecast demand?
- What will be some key elements of the cost structure?
- What are the key metrics?

Project Submission Phase 1

Experimental Task

- 10 raw problem signals from:
 - App store reviews
 - Reddit / Twitter threads
 - LinkedIn comments
 - Customer support complaints
 - Google Review
 - Any Other source/Different source
 - App Name: LinkedIn, Whatsapp, Swiggy, Instagram (Consider 3 Mobile App)
 - Give refined Pain point for any one of the mobile app
- Screenshot + source link required to be submitted

Project Submission Phase 2

Project Submission Phase 2 (Continued in next page)

- Outline the design thinking process
- Build user personas
- Build user stories
- Will you handle design and development internally or outsource? Why?

Project Submission Phase 2 (Continued in next page)

- What are the tech capabilities in your company? How will help in your tech choices?
- What features will the MVP of your product have?
- How would you prioritise the features for your product?
- How would you test your product and feature prior to deployment?
- How will you integrate AI/GenAI and Agentic AI?

Project Submission Phase 2

Experimental Task

You should take real user interview and record it based on your problem statement

- Conduct 5 real interviews (Use JTBD interview script)
- Submit:
 - Raw notes
 - Exact quotes
 - Insights → feature mapping
 - (Video interview and recording needs to be submitted)

Project Submission Phase 3

Project Submission Phase 3

- Create a sample project plan
- What methodology will you use? Why
- Create a board in Jira and attach screen shot
- What are some ethical considerations for your product?
- Use the default template and make Lean Model Canva

Project Submission Phase 4

Project Submission Phase 4A (Continued in next page)

- Outline the STP from your new product (not required for the feature)
- (sub) Brand the product
- What are the 7Ms for your new product?
- How will you launch the product? Think innovatively!

Project Submission Phase 4A (Continued in next page)

- Design the channel strategy for your product?
- What mix of online/offline and owned vs franchised are you considering?
- Will it be purely online or omnichannel? Why?
- How will you ensure parity between channels?
- Create a user flow and user journey.

Project Submission Phase 4A (Continued in next page)

Experimental Task - 1

You should attempt **one real action** in **two channels**, such as: Enquiry, Purchase attempt, Onboarding step of any product or a mobile app and Document factors like Time taken, Friction points, Drop-off moments

Deliverables

- Channel comparison
- Which channel leaks trust?
- Which channel scales poorly?

You must explain the product launch In 60 seconds in a brief sentence or a short paragraph

Project Submission Phase 4A

Experimental Task - 2

You must **speak to 5 people** and ask: “**Why wouldn’t you renew this product after 3 months?**”

Deliverables

1. 5 people interviewed (user or potential user) Video Recording
2. 5 renewal objections (one per person, verbatim)
3. Emotional drivers behind objections:
 - Trust issues, Low perceived value, Usage fatigue, Price discomfort, Complexity or confusion
4. Repeating patterns observed across interviews: Retention levers mapped to objections:
 - Feature change, Onboarding improvement, Education / support, Pricing or packaging, Habit-building mechanism

Project Submission Phase 4B (Continued in next page)

- Design the customer service strategy for your product?
- What steps will you take to increase CLV and renewal rates?
- What growth hacks/loops will you consider?

Project Submission Phase 4B

Experimental Task - 1

You must **interview 3 business owners** (any industry) and understand:

- Their **end-to-end customer support journey**
- The **most frequent support issues**
- Where customers get **confused, irritated, or drop off**
- What the business currently does to resolve these issues

Deliverables

- 3 business owners interviewed (industry + role) (Video recording)
- 5 real customer support queries (in customer's own words)
- Average time to resolution (best case vs worst case)
- Points where customers
 - Followed up repeatedly
 - Escalated the issue
 - Stopped responding
- Specific moments where users showed frustration (confusion, anger, silence)
- Current support process used by the business
- One process improvement suggested
- One product / UX improvement suggested
- One communication improvement suggested

Project Submission Phase 5

Project Submission Phase 5 - Build and Demo (10 Marks)

- Build wireframes for your product
- Build and Demo an MVP for your product (Recording link to be added in submission)
- Create & submit full PRD of the project

BITSom

THANK YOU!
